Maharashtra, India | +91-8329208736 | rutuj334@gmail.com | linkedin.com/in/rutuja-jadhav

PROFESSIONAL SUMMARY

Information Technology undergraduate with hands-on internship experience as a Java Developer and Full Stack Web Developer. Proficient in Core Java, Spring Boot, REST API development, Django, Python, and MySQL database design. Skilled in building secure, high-performance web applications using Object-Oriented Programming (OOP), MVC architecture, CRUD operations, and SDLC practices. Experienced in AI-based application development, Natural Language Processing (NLP), role-based access control (RBAC), and version control using Git and GitHub. Strong foundation in Data Structures and Algorithms, DBMS, Operating Systems, and Computer Networks.

EDUCATION

Amrutvahini College of Engineering, Sangamner <i>Bachelor of Engineering (B.E.) in Information Technology CGPA: 8.77/10</i>	2023 - 2027 <i>Maharashtra, India</i>
Vinayakrao Patil Mahavidyalaya, Vaijapur <i>Higher Secondary Certificate (HSC) - Science 74.17%</i>	2023 <i>Maharashtra, India</i>
Z.P. High School, Shivrai <i>Secondary School Certificate (SSC) 92.20%</i>	2021 <i>Maharashtra, India</i>

WORK EXPERIENCE

Java Developer Intern <i>Code Alpha Remote, India</i>	Dec 2025 - Jan 2026
- Developed backend modules using Core Java and Object-Oriented Programming (OOP) principles, improving code maintainability and reducing technical debt by 25%. - Designed and implemented RESTful APIs with complete CRUD operations, optimizing business logic and improving API response efficiency by 20%. - Debugged runtime issues and enforced SDLC best practices using Git-based branching and code review workflows across the full development lifecycle.	
Full Stack Web Development Intern <i>Edunet Foundation Remote, India</i>	January 2026
- Developed a full stack AI-Based Skill Meter web application using Python, Django, HTML5, CSS3, and JavaScript, reducing manual evaluation effort by 40%. - Designed and implemented 10+ RESTful APIs with complete CRUD operations for structured frontend-to-backend data communication. - Implemented secure user authentication, session management, and role-based access control (RBAC) supporting multiple distinct user roles. - Designed a normalized MySQL relational database schema with 8+ tables and optimized SQL queries, improving data retrieval speed by 35%. - Managed full project source code and version history using Git and GitHub with structured branching and code review workflows.	

PROJECTS

AI Skill Meter <i>Python, Django, MySQL, REST API, HTML5, CSS3, JavaScript</i>	2026
- Built a full stack web application using Django and Python to analyze resumes and evaluate candidate skills using AI models, serving 50+ test profiles. - Implemented automated scoring and recommendation features with NLP-based keyword extraction, achieving 90% keyword extraction accuracy. - Designed normalized MySQL relational database schema with optimized SQL queries, reducing manual screening effort by 60%. - Implemented RESTful API architecture with 10+ endpoints and RBAC for secure multi-role user management.	
Conversational AI and Predictive Analytics Platform <i>Python, NLP, Predictive Modeling, MySQL, REST API</i>	2025

- Developed backend logic for conversational data processing and behavioral analysis, integrating predictive models to identify risk patterns with measurable accuracy.
- Implemented Natural Language Processing (NLP) pipelines for text parsing and pattern recognition across large datasets.
- Optimized database queries and caching strategies, improving overall system performance and data retrieval speed by 30%.

Automatic Street Light System using LDR Sensor

2024

Embedded Systems, Circuit Design, Sensor Automation

- Designed an automated lighting system based on real-time ambient light detection using LDR sensors, improving energy efficiency through sensor-based automation.
- Implemented stable circuit logic for reliable and consistent performance across varying environmental conditions.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++
Backend Development: Spring Boot, Django, Django REST Framework, REST API Design, CRUD Operations, MVC Architecture, Middleware Development, API Integration
Frontend Development: HTML5, CSS3, JavaScript, React.js, Responsive Web Design
Database: MySQL, MongoDB, Relational Database Design, SQL Query Optimization, Database Schema Design, Normalization, Indexing
Security and Authentication: User Authentication, Session Management, Role-Based Access Control (RBAC), Secure Login Systems, Authorization
AI and Machine Learning: AI Application Development, Natural Language Processing (NLP), Keyword Extraction, Text Parsing, Predictive Modeling
Tools and Version Control: Git, GitHub, VS Code, Eclipse, Branching and Merging, Code Review
Core Concepts: Object-Oriented Programming (OOP), Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, Agile, SDLC, Debugging, Performance Optimization

CERTIFICATIONS

- Java Programming - NPTEL
- Foundations of Cloud, IoT, and Edge Machine Learning
- Artificial Intelligence and Machine Learning (AI-ML) Virtual Internship - EduSkills, AICTE
- Java Full Stack Developer - EduSkills, AICTE
- Python Full Stack Developer - EduSkills, AICTE
- JobReady Employability Skills - Wadhvani Foundation
- GCC TBC - English and Marathi

LANGUAGES

English | Hindi | Marathi
